STANDARD AT EURA MOBIL:

- X** Bonded and all-round sealed body composite made of hail-protected glass-fibre reinforced plastic (GRP) in Eura Mobil Sealed Structure technology
Material composite from aeronautical engineering: high torsional stiffness, best bonding strength (3.5 t on 1 m profile length), seamless sealing against moisture penetration, the hail-protected surface material enables lower third-party, fire and theft premiums with many insurance companies than with comparable vehicles with aluminium sheeting

- X Heated and insulated double floor**
Frost-protected "basement", all technical installations are installed protected in the double floor instead of inside the vehicle or on the underbody
- X Additional storage compartments in the double floor with access from the interior**
Double floor offers additional storage possibilities for exterior storage compartments or floor compartments accessible from the inside
- X Winter-proof according to EN 1646-2**
Rapid heating of the vehicle interior and guarantee of full functionality of the water system even in severe frost (test cycle with -15 degrees outside temperature)
- X Wood-free GRP walls with continuous insulation**
Rot-proof even in case of moisture penetration, easy to repair, efficient insulation without cold bridges in the wall
- X Robust furniture (3-year warranty)**
Torsion-resistant furniture with long service life and low noise development during travel
- X Wall units with sturdy metal uprights and noise damping**
Durable, quietly closing wall unit flaps
- X Lightweight GRP floor panel**
Weight reduction for more payload and floor panel resistant to moisture, road salt, dirt and operating materials
- X 10-year leak-proof guarantee on the body (up to 150,000km)**
Eura Mobil represents high reliability and thus guarantees you a high degree of safety and risk protection against possible bodywork defects
- X Water tanks protected in the insulated and heated raised floor**
Water tanks are well protected against mechanical damage as well as possible frost-related functional restrictions
- X Underfloor heating effect in the floor you walk on**
Pleasant floor temperature – you can walk barefoot even in winter!
- X Beds with slatted frame and 7-zone cold foam mattresses**
Well-ventilated beds with comfortable mattresses for a relaxed night's sleep
- X Wide body door with window**
Easier access, more brightness, view of visitors outside the door
- X Insulated frame window flush with the outer wall featuring a mosquito screen**
Harmonious integration into the vehicle design, efficient insulation
- X Robust aluminium body sills**
Sturdy scuff plate against light collision damage
- X 2 quick-acting drain valves for fresh water in the heated and insulated double floor**
Convenient water tank emptying from the inside
- X Electrically operated drain valve for waste water or manual drain cock (for coachbuilt models) in the heated area**
Simple and clean emptying of the waste water tank
- X Mini-Heki skylights**
Easy to open, durable skylights with multiple ventilation positions
- X Minimum 140-litre fresh water tank capacity**
Large fresh water capacity for more self-sufficiency from the external water supply
- X Pressurised water system** Delay-free response of the water system, water pressure like at home

IF YOU'RE LOOKING FOR SOMETHING SPECIAL ...

We've created the "Natural Heritage" ambience in the style of a modern country resort. A modern living space with muted colours, purist shapes and a natural material feel surrounds you in the Mercedes-based Profila models. Natural elements from the country landscape and crafted base materials provide the template for the relaxing mix of materials in the new furniture architecture. From the very first moment, you will enjoy that unmistakable and relaxing holiday feeling that stylishly takes you away from the monotony of everyday life.

NATURE

**... THEN YOU'LL LOVE
THE NEW LIVING SPACES
FROM EURA MOBIL**

The desire for togetherness

Naturally inviting – that's the way to describe Natural Heritage's radiant charm. Whether as a couple or with company, you immediately feel at home regardless of where your journey might be taking you. And so this overall harmony, which for all the vibrancy of the setting forgoes glitzy or effect-seeking eye-catchers, is perhaps the most important prerequisite for a relaxing time on the road. Enjoy it. You've earned it.

TR

Chalet-Mobil 2013

BACK AND AHEAD TO THE ROOTS...

... is perhaps one way of describing the new evolutionary stage of our Chalet interior in the Profila series. With the new interpretation in the "Chalet Rustico", we are returning to the traditional roots of the Alpine chalet and giving it a new look as part of the new furniture architecture.

ADDITION

Chalet-Rustico 2023

The original, rustic character is being emphasised once again – and in a striking and modern manner. Here too, nature serves as the inspiration for the setting. Allow yourself to be inspired by the calm, harmonious living space that has its own identity and strength.

Natural Heritage features furniture with a walnut décor and a coarse natural grain. The striking grain also catches the eye in the pine décor of the furniture flaps. The kitchen is styled in an elegant, rock-grey slate look. In the Chalet Rustico, the kitchen in Chalet Oak, with its light-coloured work surfaces in combination with white furniture flaps, is redolent of a modern country house kitchen.

INSPIRED BY NATURE ...

ORIGIN

With their original cast-iron look, the handles in both new living areas blend in just as harmoniously with the natural aesthetics of the furniture as the matt-black fittings do. In this living environment, the new surroundings surprise with a retro-modern feel thanks to the use of corduroy fabric and wall panels in a felt or linen look. Here, the absence of any decorative chrome, and the reduced susceptibility to marks and staining that results, is just as much a testament to the practical side of the new interior as is the floor in a robust modern concrete look.

COACHBUILTS
ACTIVA ONE

PRIORITY FOR THE FAMILY!

In the Activa One, the traditional strengths of Eura Mobil are aligned firmly with the needs of the family: generous storage space for luggage and toys in the double floor and rear garage, plenty of space for the whole family and sturdy furniture in the interior make the Activa One the first choice for campers of all ages. The long-lasting GRP bodywork also proves to be a real winner, forming the stable backbone for many carefree family holidays with a 10-year leak-proof guarantee.

EVERYONE HAS THEIR FAVOURITE SPOT ...

... could be the motto for the Activa One models. Whether it's in the seating group or in the large kitchen with lots of extra space in the cupboards, or in the children's room in the coachbuilt or the rear, or ... there are places throughout the vehicle that put everyone in a good mood. Simply beautiful to live in!

Robust upper cabinets with aluminium profiles and rattle protection feature

Children's room with pull-out bunk beds and a seating group

Large wardrobe

COACHBUILTS
ACTIVA ONE

◀
Space where you need it. Large shower room or washroom with lots of space in front of the washbasin?
Both!

SO EASY TO USE ...

The bathroom with its swivelling wash basin combines fun and functionality. When the wash basin is pulled out to the side, you have full freedom of movement in the shower as well. The cabinet with shelves on the side is always accessible and the fan heating unit keeps the bathroom cosy and warm – just like at home!

DETAILS AND HIGHLIGHTS

There's good reason why the coachbuilds from Eura Mobil are always at the top of the rankings for Motorhome of the Year awards. Word has definitely gotten round about their reliable technology, practical room division concepts and high quality materials and workmanship. And yet, every Activa One also features numerous yet to be discovered details that set the series apart from the rest.

Drip catcher

A clever detail is hidden in the rotating water outlet of the kitchen tap. No more annoying dripping and wiping! The pressurised water system on board the Activa One ensures an almost instantaneous supply of water, just like at home.

Coachbuilds

The insulated and heated coachbuilds offer you a perfect place to relax. The 160x210 cm bed rests upon a sturdy slatted frame and is well protected against cooling by efficient wall and ceiling insulation, the coachbuilt floor and a fan heating unit.

Flexibility makes the difference

In the rear of the A One 690 VB, you can decide on a whim whether you want to have a double bed at the top and just one single bed at the bottom, or the other way around, or just two single beds or even two double beds – thanks to the pull-out slatted frame, all of these options are possible.

The swivelling table

The tabletop is equipped with an extension that swivels out, thereby ensuring that the whole family has plenty of room when they sit down for a meal together. Always there when you need it, but never in the way when you need to pass through.

Single beds in the coachbuilt

In the A One 650 HS you can enjoy a relaxing night's sleep on two 2m long single beds in the coachbuilt. But if you want, you can also make a large bed out of it by inserting an intermediate piece.

Cellar arithmetic

High double floor + individually adjustable storage area = space exactly where you need it. Made possible by storage area partitioning by your authorised dealer – precisely in line with your wishes. And because it's Eura Mobil, it's all frost-proof, of course, with an underfloor heating effect as well.

An edge for you

Another hidden, unassuming detail that makes all the difference: with the sturdy aluminium panels, you will be able to handle kicked-up rocks or branches without suffering any damage to the bodywork, which is good for your wallet and your nerves.

Round seating group without losing any storage space

The safety belts in the seating group of the HS models are fixed to the wall in aluminium profiles. This preserves the full storage space volume in the double floor.

Perfectly shaped

It's not just the Activa One's intrinsic values that impress, as the coachbuilt's dynamically curved front end and roof component are also beautifully designed. The hail-proof GRP surfaces and the way the roof shades the driver's cab make this exterior design very practical as well.

SPOTLIGHT ON TRAVEL COMFORT

The current trend is for floor plans with lounge sofas facing each other, so-called face-to-face floor plans. In addition to the open spatial effect, these variants benefit from the particularly wide, comfortable sofas with additional belt seats that can be folded out for the journey if required. Eura Mobil is of course onto this trend, with the extra storage space in the double floor and garage, as well as the clever kitchen and bathroom design. The face-to-face seating groups show their strengths in the Profila RS especially, with its lift-up bed flush with the ceiling. In addition to the extra freedom of movement and seating comfort, there is also more light thanks to two large windows on both sides of the seating group.

Example floor plan: PT 720 QF ►

FOR THE WELL-RESTED

In the semi-integrated models from Eura Mobil, the joy of travelling grows with each passing day. Well thought-out spatial ergonomics with optimum freedom of movement and open lines of sight form the basis for a high feel-good factor. With extensive comfort features and a high-quality choice of materials, you will have the most wonderful time in the new Chalet Rustico. Be inspired!

WHAT A KITCHEN ...

... That's the first thing you'll say when you see the ergonomically curved kitchen centre in the EF floor plans. Lovingly detailed work on the spice rack, coupled with a large work surface and a practical, worktop-mounted hob.

◀ Example floor plan: PT 720 EF

LOW-PROFILE PROFILA T / RS

WANT TO BET THAT ...

... you'll start dreaming in Profila beds? Wide, cold foam mattresses on stable, ventilated slatted frames with adjustable headboards are the comfortable basis for a relaxed night's sleep. For even more comfort, we have positioned reading lights, USB ports and wardrobe within easy reach. The bed height can also be varied on the centrally arranged double bed in the QF versions. The layouts up to 7 m impress with a compact washroom with integrated shower cubicle and swivelling washbasin – so there is always plenty of room to move even in a compact space. The highlight of the new bathroom: the mirror can be pushed to the side in all floor plans, creating more light and air in the bathroom.

▲ Example floor plan: PT 720 EF

◀ Example floor plan:
PT 720 EF

DETAILS AND HIGHLIGHTS

Many details, one concept. Everyone will find their own personal highlights in the individual floor plans of the Profila series. What they all have in common is their distinctive functionality in a stylish, premium setting.

Easy access

The large storage compartments in the 730 EF are designed to allow you easy access to contents from the inside – and they're just as easy to load from the outside!

Variable garage

The height-adjustable bed in the QF models ensures you'll have enough space to transport bicycles if you like.

Spatial transformation

The room-divider doors that separate the kitchen and bathroom, and the two sliding doors between the bathroom and bedroom, allow you to transform the bathroom into a dressing room in the wink of an eye.

A clear symbol of quality

A sturdy GRP roof compartment on the Profila RS for the lift-up bed instead of a simple flip-up wall with a curved standard roof.

Couldn't be any easier

The sofas in the EF and QF floor plans can be transformed into single seats in the direction of travel – with Isofix mounts – in no time.

Extra bedroom

The 730 EF plays a special role in the model range. With its low single beds and a bathroom that extends across the entire width of the vehicle, this floor plan features two accessible rooms at the rear.

For tall people

The single bed variants EB / EF have large garages and comfortable beds with bed lengths of up to 196 cm. There is a wardrobe underneath and a linen compartment under the second bed.

Extremely easy to operate

The push of a button is all it takes to empty the waste water tank conveniently from the garage. No more dirty hands, no more bending over – this is what comfort is all about.

Mirror or window in the bathroom?

Both: the mirror cabinet can be pushed to the side for more light and air. The bathroom window "hides" behind it - perfect use of space and maximum variability for even more comfort.

EXCLUSIVE STYLE

The Profila T on the Mercedes Benz promises holiday enjoyment in its purest form.

With great attention to detail, we have now brought our best-selling series to the highest level of perfection in the exclusive combination with the Mercedes Sprinter chassis. The elegant and dynamic exterior design is only the emotional expression of this model series – Evolution – which is already visible at first glance. Inside, the new, exclusive "Natural Heritage" setting inspires with its natural radiance.

„Natural Heritage“ ►

PURE TRAVEL PLEASURE

In the compact 696 EB, the kitchen will surprise you with an unusually large worktop, a tall refrigerator and a spacious base unit – including sturdy kitchen pull-outs complete with soft-stop stops. The bathroom is also impressive, with a high degree of variability and great freedom of movement thanks to the swivelling washbasin. The 726 EF and 726 QF models have even more free space in their bathrooms and are perfect as a separate dressing room.

DETAILS AND HIGHLIGHTS

The new Profila T on Mercedes are in a class of their own. With the Al-Ko low frame, Alde hot water heating and an adjustable panoramic roof window, plus the exclusive Mercedes chassis, the result is a practically perfect combination.

A lightweight in its class

Thanks to the Al-Ko low frame and consistent lightweight construction, the Profila T on Mercedes has practical payload values.

Always handy

There is plenty of additional storage space in the floor hatches and storage compartments of the double floor that can be reached from the inside in a single action.

Extremely easy to operate

The push of a button is all it takes to empty the waste water tank conveniently from the garage. No more dirty hands, no more bending over – this is what comfort is all about.

Inviting

There's plenty of room for bulky luggage or bicycles in the lowered rear garage located underneath the beds.

New era with the star

The modern driver's cab of the Mercedes Sprinter with innovative safety and assistance systems conveys relaxed travel comfort.

For fans of fresh air

The new adjustable panoramic roof window (optional) guarantees plenty of light and air in the driver's cab. In combination with a tilting roof window over the seating group, it creates the ultimate fresh air oasis on warm days.

Mirror or window in the bathroom?

Both: the mirror cabinet can be pushed to the side for more light and air. The bathroom window "hides" behind it - perfect use of space and maximum variability for even more comfort.

Comfort zone

With the Alde hot water heating system, you gain heating comfort just like at home – completely draught-free and with constant heat output.

Quick loading hatch

The exterior storage compartment integrated into the body at a convenient loading height can be used for frequently used parking spot utensils in the models from 696 EB.

LIVING LIKE THE STARS

Relaxed travel and relaxation in a five-star ambience – that is what characterises a holiday in the Contura.

The effectively illuminated Contura Lounge, with its chrome-finished high-gloss furniture, elegant upholstery with decorative stitching, and stylish accessories, is the ideal place to switch off and relax. You are virtually transported from earth when looking through the Starlight Dome panoramic roof, which opens up a completely new view of the starry sky with 20% more surface area than a tilt-up roof.

Example floor plan: C 766 EF ►

ENTIRELY TO YOUR TASTE

Star-quality cuisine under a starry sky awaits you in the kitchen centre with its ergonomically curved front. Fine details such as the indirectly illuminated pull-outs, the mineral worktop and the large refrigerator (optionally in combination with the oven) emphasise the exclusive character of the interior in this area as well.

Example floor plan: C 766 EF ▼

Backlit shower column with rain shower

Room divider doors right and left for vehicles with bathroom

AN OASIS OF WELL-BEING

You can find even more luxury in the rear: the rain shower and backlit reed grass inlay ennoble the bathroom with its slate-style walls, making it an illustrious wellness area.

◀ Example floor plan: C 766 EF

LOW-PROFILE
CONTURA

Example floor plan: C 766 EF ▲

BEAUTIFULLY FINISHED

The high-gloss surfaces of the cabinet flaps, with their chrome elements, create an exclusive feel in the Contura's bedroom.

DETAILS AND HIGHLIGHTS

Storage compartment wall units

The compartments under the wall units with indirect lighting are the perfect shelves for books, smartphones and other small items

At your service

The central technology compartment brings together the tap water outlet and other technical connection equipment in a unit in the side wall that can be easily accessed via a storage flap.

Starlight dome panoramic roof

20% larger surface area than a tilting roof window and 100% inspiration – thanks to the smart-lift and soft-close functions and a guaranteed box seat under a starlit sky. Simply lift with two fingers instead of cranking! In combination with the panorama glass in the hood, this guarantees a bright living space.

Driver's cab

The railing around the roof cut-out is precision-fitted and elegantly designed for maximum headroom. The integrated reading lights are elegantly fitted.

Keeping things clean

The push of a button is all it takes to empty the waste water tank with the help of an electric drain valve – an on-board camera guides the driver to a position directly above the drain in the parking spot (optional).

Rear design

A three-dimensionally shaped rear wall made of one "cast", including direction-indicating LED running light indicators, shows the class of the Contura from afar.

Attention to detail

Elaborately crafted upholstery and back cushions with decorative stitching give the living room its distinctive look together with the fine furniture.

Stylish and practical

In the bathroom, the sophisticated ambience inspires with its slate-tinted wall, surface-mounted washbasin and high-quality fittings. Perfect warmth and comfort are assured by the Alde heating in the bathroom.

Feeling at home

... not least because of the draught-free and constant heat comfort of the hot water heating system. With the convectors in the raised floor, it also provides comfortably warm underfloor heating.

Safety on a new level

Thanks to the MB Sprinter's modern safety and assistance systems, you are always calm and at the same time safe and dynamic on the road.

UNMISTAKABLE TRAVEL IMPRESSIONS

The Integra Line already shows from the outside the premium claim of Eura Mobil in the integrated models. However, the elaborately designed GRP front with the LED double lights (optional) and the striking radiator grille doesn't stop at visual design attributes – the large panoramic windscreen with short front overhang also ensures the best possible view and thus driving safety in abundance.

Example floor plan: IL 720 EF ►

A-CLASS

◀ Example floor plan:
IL 720 EB

OPEN FOR NEW DIMENSIONS OF ENJOYMENT

The kitchen is bright and open – always with plenty of room to move thanks to the curved kitchen front, with a tall refrigerator and large pull-outs.

DETAILS AND HIGHLIGHTS

The strengths of the Integra Line are only very incompletely described with the great spatial comfort. The individual models offer even more highlights, especially in the stylish and modern GRP shell.

"Cast in one piece"...

... is how one could describe the GRP front mask, not just in terms of the visual impression it makes but also with regard to its construction design – with a perfect fit and superlative stability that help ensure a high degree of chassis torsion resistance.

Short cabin principle

The short cab overhang with steeply sloping front and short dashboard behind a large panoramic windscreen provides an excellent view of the road. The blind spot in the field of vision in front of the vehicle is minimised.

Safety first

The optional LED main headlights with static cornering lights give the IL a distinctive look– and also optimally illuminate the road ahead at night.

Painstakingly crafted details

A satin-finished aluminium grip plate and surface quality you can see and feel on the instrument panel are just two examples of the outstanding high quality materials and workmanship that define the Integra Line.

Practical box

On the passenger side in the driver's cab is a practical storage box for travel literature, chargers or other small items at hand. Naturally featuring Eura Mobil's typically stylish and stable characteristics in oak chalet finish.

Rear garage

There's plenty of room for bulky luggage or bicycles in the lowered rear garage located underneath the wardrobe.

Direct access

You can also directly access the garage from the interior. This can be very practical when you need to hang wet clothes up to dry in the bathroom, since you don't have to carry them all the way through the vehicle (IL 695 LF).

Extremely easy to operate

The push of a button is all it takes to empty the waste water tank conveniently from the garage. No more dirty hands, no more bending over – this is what comfort is all about.

Cinematic experience

The 32" screen can be easily swung out from the wall bracket in the entrance area, ensuring a perfect view from the entire seating area (IL 695 LF).

YOU CERTAINLY LEAD THE WAY ...

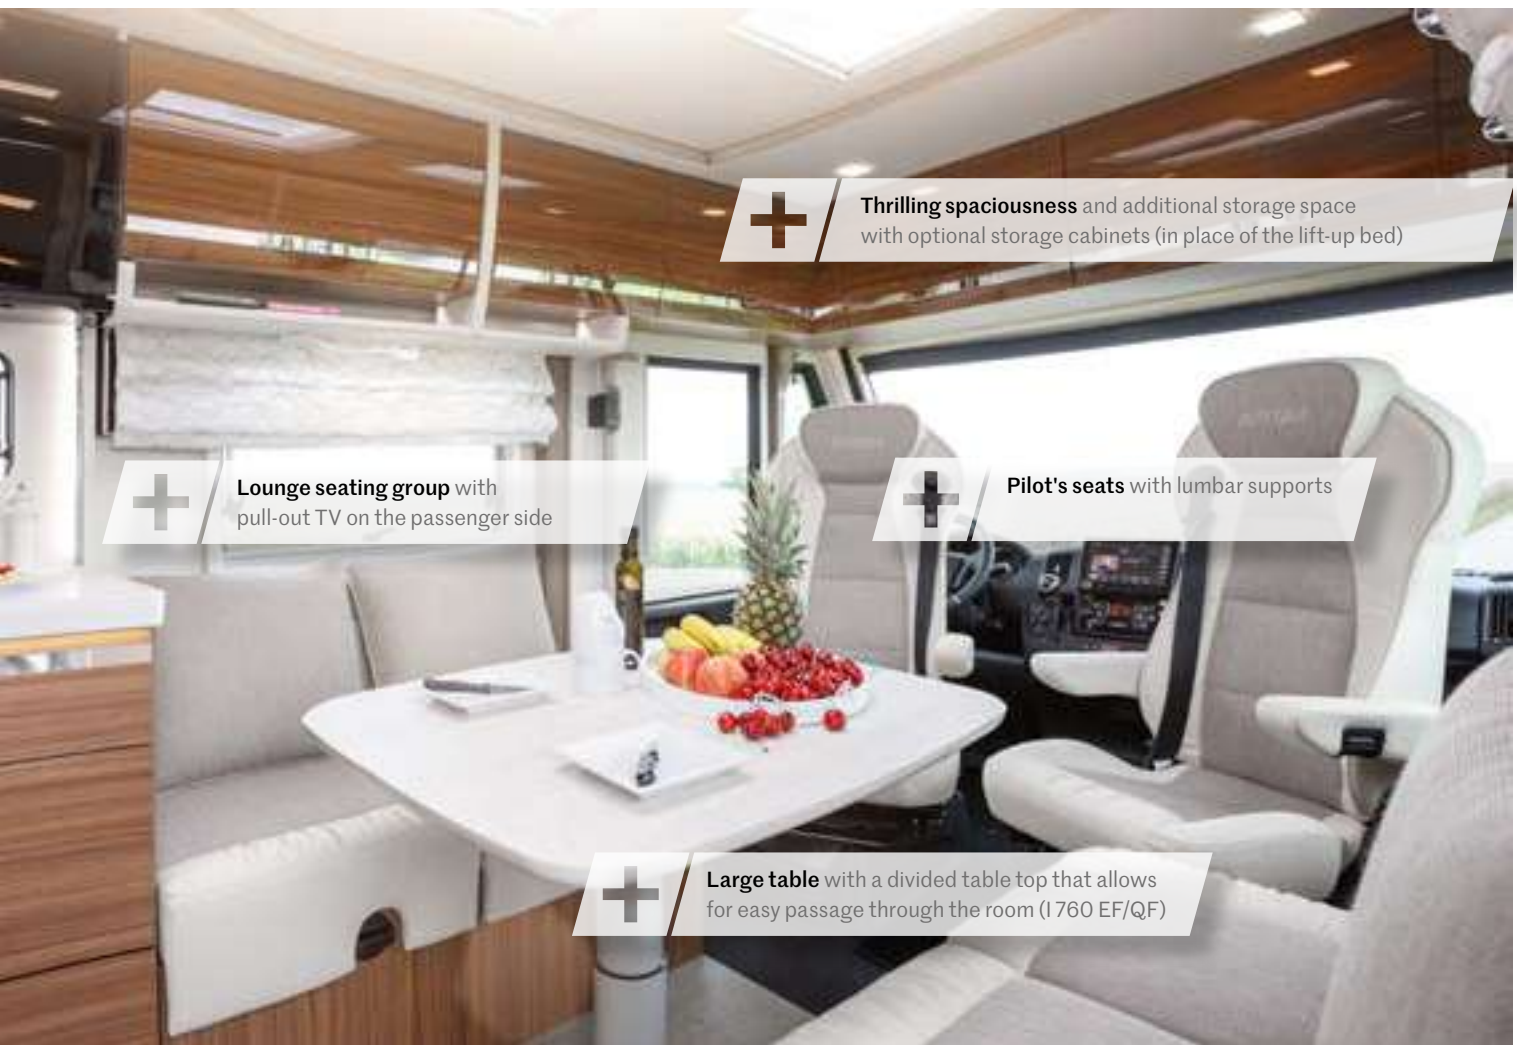

... when you travel with the Integra. Thanks to LED headlights and a short dashboard in front of the panoramic window, the luxury integrated vehicle from Eura Mobil not only allows you to keep a relaxed overview of the road ahead at all times, but also to keep an eye on everything to the rear thanks to the reversing camera and wide-angle mirrors. The LED tail lights with directional running light indicators also ensure that you are seen at your best.

◀ Example floor plan:
 I 890 EB/QB

DETAILS AND HIGHLIGHTS

Luxury as it manifests itself in the Integra is both stylish and discreet. Here, there's no desire to be conspicuous at all costs – there's only elegant design and functional perfection for you to enjoy.

A shining example

LED headlights make a thrilling impression by creating a daylight-like atmosphere as they illuminate the road ahead. The static cornering lights provide support here in turns and curves.

Nice and easy

All you need to do is push a button to lower the electrically controlled lift-up bed (which can be reached easily via the seats) to a comfortable entry height.

At your service

The central technology compartment brings together the water outlet tap and other technical connection equipment in a unit in the side wall that can be easily accessed via a storage flap.

Keeping things in order

The organisation system in the garage features storage boxes that can be mounted on the walls in a variable arrangement, thereby ensuring that everything will be put away neatly – and found again when it's needed.

Double-glazed... makes for better insulation

The side windows in the driver's cab are double-glazed and the windscreen is fitted with blinds that protect against glare and offer additional insulation (*optional*).

Keeping things clean

The push of a button is all it takes to empty the waste water tank with the help of an electric drain valve – an on-board camera guides the driver to a position directly above the drain in the parking spot (*optional*).

Great view from the rear

The back of the Integra is a sight to see as well: the single-piece three-dimensionally curved GRP rear wall speaks to a high degree of expertise – and a highly professional design.

Cargo capacity in line with your needs

The Integra 760 is available in an AL-KO two-axle or three-axle version. Those who are looking for easier handling should go with the two-axle configuration – but if you need to transport a lot of cargo, you should opt for the three-axle version.

EURA MOBIL

Your Quality Time.

All of the information in this brochure relates to the products listed herein and does not apply to any other products of Eura Mobil GmbH.

The models illustrated in this brochure show the features available in Germany. They may also contain special features and accessories that are not included with the standard scope of delivery. All weights quoted are values with a fluctuation limit of +/- 5 per cent.

Due to legal regulations, differences from the model variations described here and equipment featured may be necessary in certain countries. Please ask your Eura Mobil dealer about the exact scope and range available of model-specific and model-neutral features. Subject to errors and changes in design, equipment and special features. The publication of this brochure renders all previous catalogues invalid.

General information regarding the weight situation in motor homes

Special features (additional features) increase the weight in the vehicle's ready-to-drive state and reduce the cargo capacity. The weight of the additional equipment is detailed in our brochure information or your dealer / seller can tell you. The maximum number of persons permitted depends on the weight and axle load. It can be reduced if special features (= special equipment / additional equipment) and accessories are installed, so in the interests of cargo loading capacity certain seats cannot be used. If all seats are to be used, some cargo capacity may need to be foregone. The technically permissible overall weight and axle loads must not be exceeded. The cargo loading capacity reduces with the installation of special features (= special equipment / additional equipment) and accessories. The cargo loading capacity is also not only dependent on the weight in the vehicle's ready-to-drive state, the actual vehicle weight, the weight of the accessories and the technical permissible overall weight, but also on the respective axle loads. The only way to achieve the highest possible payload supported by the vehicle's technology is to have a corresponding, axle-load-dependent load distribution.

Unless otherwise regulated, weight in ready-to-drive state as per Article 2 (4a) Regulation (EU) 1230/2012 is defined as:

Vehicle dimensions with standard features according to manufacturer specifications (incl. vehicle tool kit + charging cable for superstructure battery)

+ fuel tank filled to 90%

+ 75 kg (weight of the driver)

+ fluid gas bottle (filling capacity of 11 kg) made of aluminium filled to 100 % (equals 18 kg in total)

+ Fresh water tank filled to 100% in drive position (capacity of the fresh water tank is limited to 25 litres of fresh water in ready-to-drive state, where technically feasible*)

= Weight in ready-to-drive state

* marked capacity of the fresh water tank pursuant to appendix V. Part A (2.6 Fn). (h) Regulation (EU) 1230/2012 is limited according to vehicle model to 25 litres by an overflow valve (recommended filling for driving)

The technically permissible overall weight according to Article 2 (7) Regulation (EU) 1230/2012 is defined as:

The vehicle's maximum weight when loaded as provided by the manufacturer.

Pursuant to the information provided in the catalogue, the maximum cargo loading capacity is defined as:

Technically permissible overall weight - weight in ready-to-drive state = maximum cargo loading capacity.
